NOTES:

1. The data source for the percentages of household income in this table is the American Community Survey (ACS). The ACS is an ongoing statistical survey by the U.S. Census Bureau, sent to approximately 250,000 addresses monthly (or 3 million per year). ACS estimates are based on data collected from January 1, 2005 to December 31, 2009, and are not 2010 Census data. The percentages of household income from the ACS were applied to the 2010 Census counts of the occupied housing units at the census block level to obtain estimates of household income as of April 1, 2010.
2. The **COUNT** columns contain number of occupied households for each district, and for household income categories within each district.
3. The **%** columns contain household percentages for each household income category within each district. TIP: Read these percentages across.
4. For some RDUs that had housing units in the 2010 Census PL94-171 data, there were household variables with no data in the ACS 2005-2009 5 year merged file. Either these housing units were not in existence at the time of the ACS data collection or none were picked up in the ACS sampling. There were also small differences between the ACS based estimates and the PL94-171 counts caused by rounding. Consequently, our estimates for these variables will not match exactly the housing unit numbers in the PL94-171 and there are differences in our table totals. The number of households is 22 lower than the PL94-171 occupied housing units.

NOTES:

1. The data source for the percentages of self-reported estimated value of homes in this table is the American Community Survey (ACS). The ACS is an ongoing statistical survey by the U.S. Census Bureau, sent to approximately 250,000 addresses monthly (or 3 million per year). ACS estimates are based on data collected from January 1, 2005 to December 31, 2009, and are not 2010 Census data. The percentages of home values from the ACS were applied to the 2010 Census counts of all housing units at the census block level to obtain estimates of home values of April 1, 2010.
2. The **COUNT** columns contain number of occupied and unoccupied households for each district, and for home value categories within each district.
3. The **%** columns contain household percentages for each home value category within each district. TIP: Read these percentages across.
4. For some RDUs that had housing units in the 2010 Census PL94-171 data, there were household variables with no data in the ACS 2005-2009 5 year merged file. Either these housing units were not in existence at the time of the ACS data collection or none were picked up in the ACS sampling. There were also small differences between the ACS based estimates and the PL94-171 counts caused by rounding. Consequently, our estimates for these variables will not match exactly the housing unit numbers in the PL94-171 and there are differences in our table totals. The total number is 24,351 cases fewer than the PL94-171.

Homeowners/Renters from American Community Survey

This redistricting plan distributes the County's household by homeowners/renters per ACS data as shown below.
